Work Experience

Full Stack Developer Themespell

Nov 2020 - Sept 2021

LocalPress - LocalPress is a starter WordPress theme. I'm one of the contributors to this project. I develop theme demos using WordPress, elementor, and LocalPress theme. After developing demos, I used to add these demos in localpress theme. Using this theme, we can create local business websites within 5mins. Around 1000+ users use this theme and I'm proud to member of this product.

Rig Element - Rig Element is a WordPress-based elementor plugin extension. I contributed to this project. Rig element is extended elementor plugin features. This plugin helps to build dynamic websites. This plugin has advanced addon features and this plugin has lots of users.
